DETAILED ACTION

Double Patenting

1. Claims 1-68 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-34 of U.S. Patent No. 6,712,694.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the Patent describe the rotatable reels as "a rotatable structure", "a plurality of structures", and "a plurality of symbol groups", while the claimed invention describe the rotatable reels as "a mechanical movable structure", and "mechanical rotatable structure". Also the claimed invention recites "at least one processor operable.....". This is not recited in any of the independent claims of the Patent.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-68 are rejected under 35 U.S.C. 102(b) as being anticipated by
Takeuchi et al.

The patent to Takeuchi et al. discloses a gaming device comprising a cabinet, and a mechanical movable structure 12B having a plurality of different symbol groups F. The movable structure is operable to rotate wherein the symbols groups F move vertically. A mechanical indicator 16 supported by the cabinet oscillates transversely relative to the movable structure and independently from the movable structure to indicate one of the symbols from the symbol group, see Figs. 1, 3 and 5. A processor inherently operates the movable structure and mechanical indicator.
